

# Post-Chemotherapy Evaluation Report

## Patient Information

**Name:** Olivia Taylor  
**DOB:** December 17, 1985  
**Email:** olivia.taylor@example.com  
**Allergies:** None  
**Medical Record Number:** 556677

## Appointment Details

**Date:** May 24, 2024  
**Time:** 10:00 AM  
**Doctor:** Dr. Andrew Clark, MD

## Chief Complaint

Evaluation after completing chemotherapy for breast cancer.

## History of Present Illness

Olivia Taylor is a 38-year-old female with triple-negative breast cancer, diagnosed in April 2023. She has completed 8 cycles of dose-dense AC-T chemotherapy.

## Past Medical History

- Anxiety

## Medications

- Doxorubicin (Adriamycin):** 60 mg/m<sup>2</sup> IV every 2 weeks
- Cyclophosphamide:** 600 mg/m<sup>2</sup> IV every 2 weeks
- Paclitaxel:** 175 mg/m<sup>2</sup> IV every 2 weeks
- Sertraline:** 50 mg PO QD

## Review of Systems

- Constitutional:** Fatigue, no weight loss
- Respiratory:** No dyspnea, no cough
- Cardiovascular:** No chest pain
- Gastrointestinal:** No nausea or vomiting

## Physical Examination

- General:** Appears well, no distress

- **Vital Signs:** BP 120/80, HR 72, RR 16, Temp 98.6°F
- **Breast:** No masses, no tenderness
- **Chest/Lungs:** Clear to auscultation
- **Cardiovascular:** Normal S1/S2, no murmurs
- **Abdomen:** Soft, non-tender

## **Assessment**

- **Triple-negative breast cancer, post-chemotherapy**
- **Anxiety, controlled**

## **Plan**

1. Schedule a follow-up MRI of the breast in 4 weeks.
2. Referral to radiation oncology for adjuvant radiation therapy.
3. Continue sertraline for anxiety.
4. Follow up in 4 weeks to review MRI results and plan further treatment.
